SECRET/SECURITY INFORMATION

25X1A

3. An underground plant is located in a forest in Arsaki /56238-3829E7, Acskovskaya Oblast, about 100 kms from Messow. Some workers live near the plant in the compound, while others are transported daily by buses. The work of this plant is secret. Workers, themselves, do not know the nature and purpose of their jobs.

25X1X

4. I also know of two military plants, Nos. 329 and 317, located in a forest near Reutovo /5545N-3752E/, one km from Balashikha station. However, I do not know what is produced in these factories. When I applied for a job there, they told me I could work but could not live in the workers compound near the factory. They said this was necessary because and the quarters were already overcrowded.
